

Typograf 5 for Windows

View and preview fonts

- Display all OpenType, TrueType and Type 1 fonts on hard drives, DVD, CD, opticals or specific folders, including all subfolders. Sort viewed fonts by name, file, family, copyright, width, date, size.

Display all font properties

- font information: full name, family name, designer, vendor, version, copyright, trademark, ...
- file data: size, date, file location path
- typeface classification by PANOSE system, IBM Font Classes or the Windows internal metric structure
- Unicode character set, keyboard layout, zoom view for details
- edit font information

Compare fonts

- find related fonts based on typeface classifications
- compare various fonts using tables that show major font features, file data, character width, number of kerning pairs, ...
- find duplicate fonts on disks, DVD, CD, ...

Print fonts

- print 1, 6, 20, 40 or 80 fonts on an A4 page, sample pages for a font, character set, keyboard layout
- pdf export

Manage fonts in Sets

- Group your fonts for a specific project/client into Sets to load them as needed.

Network / Server

- quick preview of font files on your network
- all employees have access to the same font Sets
- authorize users to create, edit or load font sets using Windows' user management
- It is not necessary to install the Typograf software on individual users' computers for access to shared font Sets.

Database

- Catalog all your fonts with the database. That way you'll always know which drive, DVD, CD-ROM or folder your fonts are on.

Font file management functions

- copy, move, delete font files
- load or unload fonts
- install or uninstall fonts
